After installation the approved roof installer automatically informs Ecclesiastical that the alarm has been installed and the policy cover is increased.

There is no third party accreditation performance standard for roof alarms as this is very much emerging technology. Ecclesiastical have devised a minimum performance standard for which our approved suppliers have agreed to install roof alarms to these standards. We are able to consider roof alarm installations from non-approved installers.

Before being granted approved supplier status Ecclesiastical require the installer to demonstrate their expertise in the heritage sector.
