Risk Management Toolkit Summary

RISK MANAGEMENT TOOLKIT SUMMARY

Why risk management is important

Risk management is a critical activity that helps you understand and manage your risks (and opportunities)

Risk management will support you in achieving your strategic objectives, priorities and targets

Risk management should be an integral part of your business operations and support decision making.

Risk management process

Step 1 - Risk identification

Step 2 - Risk analysis

Step 3 - Risk prioritisation

Step 4 - Risk mitigation

Step 5 - Risk monitoring

Six risk categories

Strategic

Negative impact on strategic objectives e.g. mergers, diversification, loss of a key supplier, reputation issue.

Operational

Negative impact on day-to-day operations e.g. loss of a critical system, data loss, business interruption.

People

Negative impact on staff, volunteers and other people you interact with e.g. key person dependency, recruitment and retention, capacity and capability.

Legal/Regulatory

Negative impact on your ability to comply with the legal and regulatory landscape e.g. breach of data protection, non-compliance, legal action (tribunal).

Hazard

Negative impact on the organisation caused by a hazard of some sort e.g. fire, flood, health and safety incident.

Financial

Negative impact on your financials e.g. increased pension fund liabilities, negative movements in the interest rate, fraud, increase in supplier costs. RISK MANAGEMENT TOOLKIT SUMMARY

Step 1 – Risk identification

Think about your strategic objectives and priorities

Consider the six risk categories (see previous table)

Brainstorm/workshop with colleagues (sharing perceptions)

Examination of trends

Analysis of last year's problems

Information from similar organisations

Awareness of new initiatives, agendas and regulations.

Step 2 – Risk analysis

Background	Cause	Consequence
General background	What could trigger the event?	What could the consequences be?
What?Where?How?	How?Why?When?	How big?How bad?How much?

Step 3 – Risk prioritisation

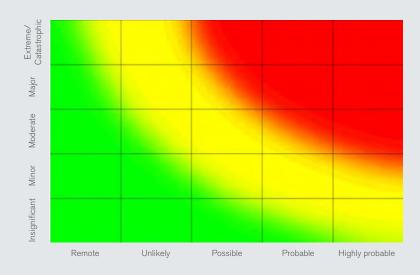

How big an impact will the risk have on your organisation

Assess each risk on an 'inherent' basis (before controls are implemented) and a 'residual' basis (after controls have been implemented)

How likely is the risk to occur? (refer to Impact and Likelihood assessment guides on the next page)

The risk matrix provides a focus to plot the residual risk scores (the impact x likelihood ranking = risk score)

Those in the top right hand corner are the more pressing ones that will require most attention (see risk matrix/heat map below).

RISK MANAGEMENT TOOLKIT SUMMARY

Step 4 – Risk mitigation

Assess current actions and controls - are they adequate or are more needed in line with the four T's approach (Tolerate, Treat, Transfer, Terminate)

Develop smart actions that will either reduce the likelihood of the risk occurring or minimise the impact should it happen.

Step 5 – Risk monitoring

Ensure risk reporting is part of performance monitoring

Determine frequency of reporting depending on risk scores

Focus on those risks above the tolerance line (top right hand corner of the heat map)

Delegate a group of individuals to be responsible for monitoring these risks e.g. Senior Leadership Team.

Risk likelihood						
Scale	Description	Occurrence	Probability			
1	Remote	1-5% (1 in 20 years)	Exceptional circumstances			
2	Unlikely	6-15% (1 in 6/7 years)	Few circumstances			
3	Possible	16 - 40% (1 in 2/3 years)	Some circumstances			
4	Probable	41 - 75% (1 in 2 years)	Many circumstances			
5	Highly Probable	76 -100% (1 in < 2 years)	Frequent circumstances			

Risk impact						
Scale	Description	Service	Safety/People	Financial		
1	Insignificant	 No impact on service No impact on reputation Complaint unlikely Litigation risk remote. 	No fatalitiesMinor impact on people's heath.	1-2% of turnover		
2	Minor	Slight impact on serviceSlight impact on reputationComplaint possibleLitigation possible.	 No fatalities A small number of minor injuries requiring first aid. 	3 - 5% of turnover		
3	Moderate	 Some service disruption Potential for adverse publicity Complaint probable Litigation probable. 	 No fatalities Significant number of people affected requiring first aid. 	6 - 8% of turnover		
4	Major	 Service disrupted Adverse publicity not avoidable (local media) Complaint probably Litigation probable. 	 Significant number of people affected Hospitalisation required as well as medical treatment. 	9 -15% of turnover		
5	Extreme/ Catastrophic	 Service interrupted for a significant time Major adverse publicity (national media) Major litigation expected Resignation of senior management/board member Loss of beneficiary confidence. 	 Fatality/fatalities Large number of people affected Multiple serious or extensive injuries. 	>15% turnover
